

# From Being Bigger to Being Better

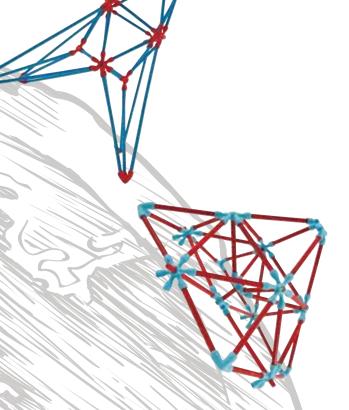

After being in the toy and educational industry for over three decades and becoming the market leader, new opportunities occur every day, so do threats, we start to think back: What do we really want to be? What do we want to achieve?

Commercially, we will surely continue growing the business and maintain reasonable profits, embracing new opportunities when they present themselves, and ethically, we will never compromise on quality or safety. We keep our consumer – children – at the heart of everything that we do, and we are committed to making better products, not more products; and on being better company, not necessarily a bigger company.

Sincerely,

Peter Handstein Founder & CEO

## From Being a Wooden Toy Company to being a Wooden-based Toy Company

Mahatma Gandhi has a famous saying: "If we are to reach real peace in the world, we shall have to begin with the children." Back to the philosophy of Hape, play is in the nature of every human being, it spans space and time. Only a healthy-minded child can grow into a sane adult, and in order to make this happen, those in the toy business and educational figures all over the world should work tirelessly.

Stemmed from a wooden toy company, mainly producing wooden and bamboo toys, recently Hape boldly adds new elements into its design, for example, FASAL, bioplastic, rice, these are all new and sustainable materials. Hape is transforming from a wooden toy company to a wooden-based toy company, however, no matter what we make, we will always keep to our commitment: Never simply pursue eye-catching products, or to chase

## If we are to reach real peace in the world, we shall have to begin with the children. Mahatma Gandhi

profit, but to never add any element of weapons or violence into Hape branded toys.

After three decades' of development, today Hape is not only a toy brand but also a transmitter and successor of educational concepts, the representative of an environmental friendly lifestyle and a platform for the mutual development of all generations.

Let's salute the children and all the adults who still have that child within them - and never lose sight of the fact that we all come into this world as a child, no matter how worldly or large we grow.

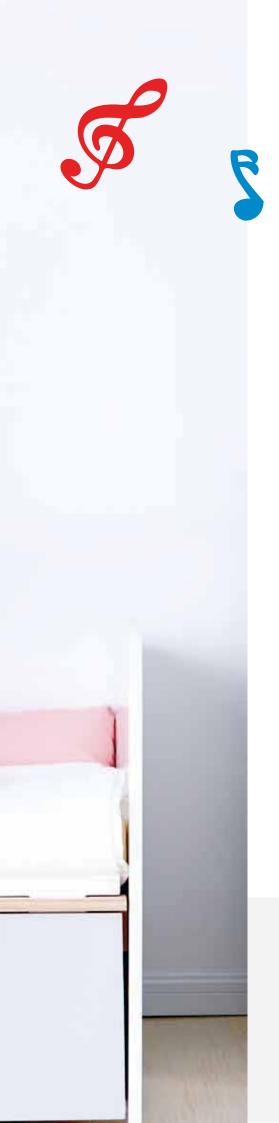

### Love Play Learn

Deep in our hearts, we believe that play is the most important thing for children all over the world. Germany invented the word and the concept "Kindergarten", and if children learn true play, they will have deeper understanding of many things in life and therefore become much more powerful adults in the future.

Holding the Hape philosophy "Love Play Learn" dear to our heart, we believe:

Love is the mutual love between child and parent, Play is the experience of success or failure, Learn is the natural outcome from love and play.
