On the Fourth Decade of Toys Creation

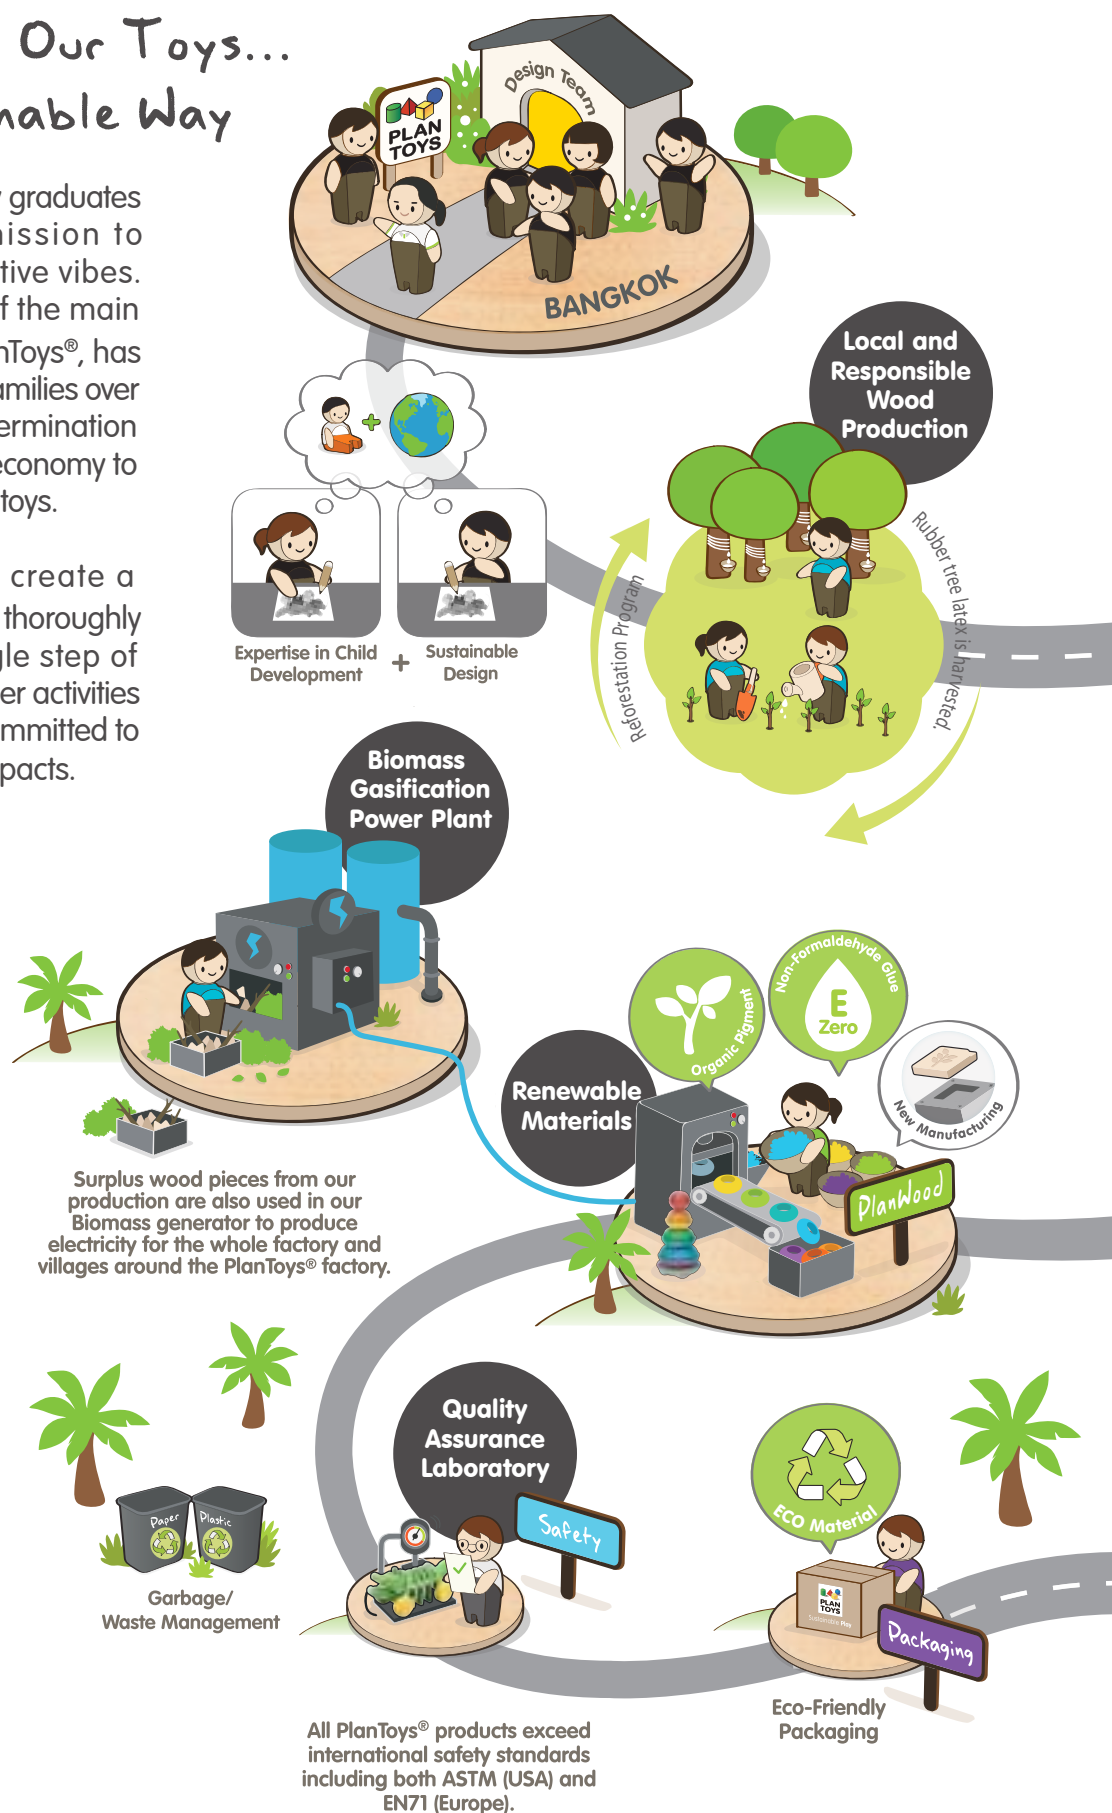

The Journey of Our Toys... Through Sustainable Way

Back in 1981, seven university graduates have been holding a mission to infuse the world with positive vibes. Vitool Viraponsavan, one of the main driving force established PlanToys®, has been inspiring children and families over the world with steadfast determination to sustain environment and economy to the fullest through innovative toys.

With a strong mission to create a sustainable world, PlanToys® thoroughly concerns about every single step of production line as well as other activities as we are wholeheartedly committed to minimizing environmental impacts.

With a strong mission to create a sustainable world, PlanToys is determined to conduct its business with careful consideration for the environment. We always make sure to use the best natural resources and create only minimum to zero waste throughout our production line.

Sustainable Material

Reclaimed Rubber Trees

All PlanToys products are made from natural rubberwood trees that no longer produce latex. No fertilizer is added to soils in three years prior to harvesting to ensure that all woods are toxic-free.

Chemical-Free and Kiln-Dried Process

To make woods durable, PlanToys uses a chemical-free and kiln-drying process.

PlanWood™

The innovation of grinding surplus sawdust and wood chips from production using thermal process to form a shape brought us to PlanWood™. Together with solid wood, customers will get high quality, safe and sustainable products.

E-Zero (Non-Formaldehyde Glue)

PlanToys pays attention to the smallest detail. All products are free from toxic as we use a certified E-Zero glue which is non-formaldehyde to combine each parts of the products, instead of using traditional toxic wood glue.

Organic Pigment

PlanToys commits itself to find the best eco-friendly materials. The organic pigment is used in our PlanWood™ production, making the material not only good for our children but also for our environment.

Water-Based Dyes

PlanToys uses only water-based dyes. There are no chemical dyes containing lead or any other heavy metals in our products.

Soy Ink and Recycled Paper

Recycled paper and soy ink are used for our printed materials. Soy ink is biodegradable comparing to standard chemical ink.

Sustainable Manufacturing

ASTM & EN71

To make sure all products are up to the highest standard, we internally conduct our own quality assurance testing on our production before sending them all out to a third party for an international testing. All PlanToys products not just meet but exceed international safety standards including both ASTM (USA) and EN71 (Europe).

OHSAS 18001 & SA 8000

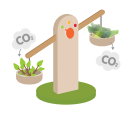

OHSAS 18001 certification is to confirm our healthy work environment, both in terms of safety and health standards for employees in the office and the factory. PlanToys also received SA 8000 certification for enhancing our employees' quality of life by providing full and equal opportunities to all employees.

ISO 9001 & ISO 14001

PlanToys received ISO 9001 certificate for world-class quality of products and services and ISO 14001 certificate for excellent environmental management.

Eco-Efficiency Manufacturing

As a carbon neutral company, PlanToys, in cooperation with Plan Group, does a reforestation each year to absorb Carbon dioxide from a production. Last year, we planted over 3,900 trees.

Solar Energy

PlanToys uses solar energy to generate electricity at our PlanToys Children Museum in order to reduce electricity usage and carbon footprints.

Biomass Gasification Power Plant

Nothing is wasted at PlanToys factory, wood pieces and discards are fed back into our Biomass gasification power plant that produces electricity for the whole factory and some nearby villages.

Sustainable Mind

PlanToys® Children Museum

PlanToys Children Museum in Trang displays fascinating history of toys from all around the world. These include toys made from different materials such as metal, plastic and wood. Since its opening in 2000, PlanToys Children Museum now has over 110,000 visitors coming as individuals and groups with tour guides provided. Both children and adults will get hands-on experience from playing with toys and get educational fun that teaches children about nature, society and environment and also explore their wildest imagination and creativity.

Sarnsaeng-Arun Culture & Environmental Foundation

Aiming to foster environmental minds, PlanToys started Sarnsaeng-Arun Foundation running a public library, a park, a hermitage and a magazine that highlight environmental and healthy lifestyle. This foundation also organizes many activities through a portion of PlanToys profit.

Happy Organization

There are several activities that happiness and productivity thrive such as Co-operative shop – Employees can purchase goods at below market prices. Members can purchase items on credit and will later subtract their cost from wages without charging interest.

Plan Loves Forests Program (Reforestation Program)

In collaboration with Plan Group, each year we arrange an annual Plan Loves Forests Program. We intend to give back to environment by planting trees in selected areas in need of rehabilitation resulting from regulatory failure, deforestation and wildfire. With around 50,000 trees planted in Chaiyaphum, PlanToys aims to continue this inspiring program for at least another 10 years to bring back the glorious state of biodiversity.

Children and Community Club

PlanToys established Children and Community Club encouraging children to join out-of-classroom activities which are beneficial for their learning development. During school holidays and Thai Children's Day, children also come to participate in various enriched activities.

Mom-Made Toys Project

In celebration of the 30th anniversary of PlanToys, Mom-Made Toys project was established in order to create a series of toys that truly helps development of children with special needs. Together with LOWE Thailand and mothers of children with special needs, we created three types of toys for children with cerebral palsy, autism and visually impairment.

World Class Recognition

PlanToys® is a source of creative satisfaction around the world.
